Design Option

Choosing the right design option for you

Option 1 - Free 30 minute Design Consultation

For your design consultation, it would be beneficial for you to bring measurements and photographs of your garden, together with any pictures or images you have seen that show design styles that you would like to incorporate into your garden. This will enable our designer to visualise your requirements and skillfully create a design concept suited individually to your needs. This consultation will give you inspiration, valuable advice and is the first step in choosing one of the following comprehensive design options that will help to bring your plans to reality.

Option 2 - Paving Layout

A technical drawing showing a layout pattern for paving or decking

£60*

(50% refundable against orders over £350)

A scaled, clearly labelled drawing showing the layout and quantities required to construct patios and paths assessed from measurements supplied by yourself. This plan, in conjunction with a material estimate, will provide an accurate costing and should reduce overall expense.

(All plans are based upon measurements being supplied and a restriction of 3 products.)

* Please call for Layout price if area is over 75m² and of a random design.

Option 3 - Detailed Design Plan

Detailed drawing and cost estimate

£175

(50% refundable against any order over £750)

The Ruscrete designers will combine their creativity and knowledge with your personal requirements to transform concept ideas into a fully detailed design plan. The plan is accompanied by quantities of material and an estimated cost. Though this is not a technical drawing, it will be invaluable in helping you to instruct your contractor on the design, products and details of your intended garden.

(All plans are dependent on the accuracy of the measurements and information provided. Amendments to final plans can be made, however charges may apply.)

Option 4 - Home Visit Consultation with:

a Detailed Plan

£240

(50% refundable against any order over £850)

One of our design team will visit your home to assess your garden and its characteristics. This will give the designer a real feel for existing features, your tastes and style of course, the potential it holds. It would be advantageous to take measurements in advance of the visit enabling maximum time to be devoted towards the creative aspect. After a follow up discussion at our studio, a detailed design plan will then be produced.

b Planting Plan

£95 (non-refundable)

This option incorporates a visit to your property to assess and discuss your planting requirements. Suitable plants from a variety of planting schemes will be selected to form a planting plan for your garden. We will also assess the soil properties and evaluate sun and shade characteristics that are particular to your garden. Your planting plan will also be fully quantified and costed with your budget in mind. In association with a local nursery, we can supply top quality plants for you to convert your planting plan into a reality.

c Detailed Plan including **b**

£280

(50% refundable against any order over £1500)

This full package incorporates all the elements of options **a** and **b** detailed above. All aspects of your garden will be given consideration to create synergy between the soft and hard landscaping features. With our professional garden designers' experience, combined with Ruscrete's reputation for specifying and supplying high quality products, this option gives the ultimate opportunity to create something truly special in your garden.

d Lighting Design Service

£60 (non-refundable)

We will arrange for one of our lighting specialists to visit and assess your garden. They will analyse your garden layout and discuss your lighting requirements. This will result in a detailed listing of what's needed to achieve the perfect finishing touch to your garden.
